

## Oleeva® Fabric is now OEKO-TEX® Standard 100 Certified

Oleeva® Fabric – known all over the globe as the premier scar management choice for Plastic and Burn Surgeons to effectively manage the appearance of hypertrophic scars and keloids is now the **only** scar management product to pass the rigorous **OEKO TEX® Standard 100 Certification**. Please visit [www.oeko-tex.com](http://www.oeko-tex.com) for more details.

*OEKO-TEX® is a global certification system you can trust. Products with the STANDARD 100 by OEKO-TEX® label have been independently tested for harmful substances according to strict scientific criteria that go beyond global legal regulations*

Oleeva® Fabric is constructed of medical grade silicone utilizing the patented Silon® technology bonded to a silky fabric backing which is certified safe for skin contact. This same technology has been used for over 25 years and now Bio Med Sciences continues to demonstrate itself as a pioneer in manufacturing medical devices with this newest certification distinction.

### **The benefits of Oleeva® Fabric are clear:**

- Clinically proven to prevent and reduce the appearance of hypertrophic scars and keloids
- Safe and Effective – over 25 years of successful clinical use in plastic surgery, burn rehabilitation, and dermatology
- Ultra-Thin, Flexible and Breathable – utilizing patented Silon® technology
- Strong, Durable and Self-Adherent – washable and reusable for effective scar management
- Available in a wide range of sizes as well as pre-cut shapes for a variety of plastic surgery procedures
- Proudly made in the USA under strict ISO, FDA and cGMP standards for medical devices
